

## VR-Society Economy

Economies are the driving force of human endeavor, but they are mainly limited to physics and geography. Virtual Reality economies don't have ANY restrictions, so they mix well with real life because **geography is no longer an obstacle** for networking events, company meetings or teaching classes.

Blockchain economy inside **VRS EMPOWERS ALL GLOBAL CITIZENS**, no matter race, sex, wealth, political views and religion. The future will start with people using VR platforms to mimic or enhance real life but will grow into a completely new world for people to express themselves in new ways, new unheard of services and business models to emerge and for new companies to launch. In the past companies like Amazon and Facebook weren't created a few days after the Internet was born. The first stage of the internet was simply text and pictures but emerged into an interactive platform between users and companies. Same with blockchain and digital assets and services ownership, while today's solution are well suited for today's needs, hundreds of new solutions will pop in the coming months and years.

**We believe that Virtual Reality will play a key role in the development of humankind.** It will be a parallel world where the citizens are the owners of their digital assets and experiences. While there has been innovation in technology hardware, such as the transition from personal computers to mobile devices, it's hardly comparable to the transition from real life to virtual life. We're adding another dimension to the world with a feeling of a real presence that will have an immense impact on education, work and leisure!

VRS VR platform is about socializing, playing, working, trading goods, creating content in VR and shrinking the world even more than technology has already accomplished over the past 30 years. We've already spent years laying the groundwork for our economy by making it truly decentralized and allowing users to truly own their digital possessions as NFTs, so that they have full control of what, how, and where they trade, use and utilize their belongings with the latest advancements in blockchain technology, especially on the Ethereum network, we found the optimal technology to build a strong and solid groundwork for our economy. The Ethereum platform allows companies to build and trade digital goods and services for a more powerful user experience that incorporates safety, privacy and encryption for true ownership of digital items.

This brings us closer to our goal of providing the best possible **VR platform that gives all the power of ownership to its users**. We are one off the first Virtual Reality platform to allow users to secure the ownership and authenticity of their creations.

### **Three cornerstones of our Economy:**

- Tokenization of virtual land
- Tokenization of digital assets and experiences
- Decentralized marketplaces

### **Users will be able to:**

- Own and monetize their creations. Sell their items in the open marketplaces.
- Be a part of the VRS Economy.
- Express themselves by creating, building and monetizing their land.
- Enjoy a stunning, constantly changing, persistent Virtual Reality world which can be explored by thousands of people at the same time.
- Tokenizing and selling their creations directly from within VRS Metaverse.
